Experience

Digital Media Designer, Western University

June 2022 – Present // London, ON

- Perform Quality Assurance (QA) Testing for websites and software before being launched to **28,000** users to verify functionality
- Use **Figma** and **Adobe Illustrator** to prototype and design web projects
- Collaborate with designers and developers to track project defects using **Jira**
- Develop and integrate interactive content using **HTML** and **CSS** for courses
- Provide technical support to staff and faculty using eLearning technology

Designer, Women+ in Tech Society

July 2022 – Present // London, ON

- Strategize and improve the clubs internal design system and workflow
- Create interactive designs for complex web applications by way of page/user flow diagrams, site maps, and interactive wireframes in **Figma**
- Conduct user research by interactively testing designs and usability testing using high and low prototypes
- Design adaptive layouts for consistent user experience across devices

Projects

ashleyoyewole.dev | React, JavaScript, CSS

- Engineered and deployed a dynamic, responsive website that showcases past development projects
- Built frontend using **React**, **JavaScript** and **CSS** languages and frameworks
- Hosted and deployed the website using **Netlify**, **GitHub** and **SEO** tools

PostWize | HTML, CSS, Bootstrap

- Developed and shipped an interactive web application that stores job applications from various employment search sites
- Architected the frontend and in-app features like downloadable & customizable calendars, and prompting user to join Zoom meetings
- Designed the site prototype using **Figma** and deployed with **Netlify CLI** tools

Employee Record System Database | Java

- Programmed a **Java** based system that stores, sorts, and returns employee records to the console using classes and array lists
- Offers options to add new employees, print out data, and save data to a .txt file
- Designed a **UML Class Diagram** to visualize the relationship between objects within the system

Intelliview | HTML, CSS, React

- Collaborated with a team to build a platform that stores past job interviews
- Worked closely alongside designers and fellow developers to develop, document and manage the web-app using **GitHub**
- Built dashboard page utilizing **HTML** and **CSS**, later merged to **React** app

Education

Western University

Bachelor of Science,
Computer Science

- Sept 2021 – April 2025
- Scholarship of Distinction

Skills

Languages

HTML, CSS/Sass, JavaScript,
C/C++, Java, Python, SQL

Libraries & Frameworks

React, Material UI, Tailwind,
pandas, NumPy, Seaborn

Design

Adobe XD, Figma, AutoCAD

Developer Tools

Git, Netlify, Heroku, Jira

Relevant Courses

Information Systems, Data
Science, Systems Programming

Hackathons

2022 – Uncommon Hacks
Winner of Best Web
Development track

2022 – SheHacks+ 6
Won 2nd Place Overall, Best
Use of Google Cloud

Leadership

Vice President of Events,
Game Design Society

Organizer, Hack the 6ix

(Authorized to work in
the United States without
a visa.)
